

Green Forex Innovation

WHITEPAPER

Most Trusted Global Crypto Company

Green Forex Innovation

The world is dynamic constantly shifting, and presents new opportunities. We aim to build the Green Forex platform that will guide this new technology into the future, starting with a token and new innovative cryptocurrency exchange.

Green Forex token, GFT is the utility token forming the backbone of the Green Forex ecosystem. GFT token will be based on Binance blockchain. Its total supply is 1Billion. The token holders will be rewarded with various benefits on the Platform, and in our future projects - whether or not detailed within this white paper.

Green Forex Vision and Mission

Our team truly believes in economic decentralization. However, the most common scenario tends to be that a small number of addresses holds huge amounts of tokens. With Green Forex we want to stand up against this kind of distribution and use our in-house mechanisms to work towards this goal.

Green Forex aims to become the most decentralized BSC token. Through the usage of cutting-edge technology mechanisms, 60% of Green Forex total supply will be distributed among BSC active users through staking. Our goal is to spread Green Forex philosophy by gaining trustworthy holders through the fair distribution of the token.

GFT TOKEN FOUNDATION

TECHNICAL DESIGN: SIMPLE & SECURE

When speaking of a decentralized network, we are, of course, alluding to our application, made accessible through a series of Smart Contracts (programs on the Blockchain that run on a pre-determined schedule and are typically used to automate the swift execution of agreements). This approach allows for the facilitation of services, usually only available to centralized financial institutions and governed bodies. This innovative approach allows for those that haven't yet gained certitude to use the Aside from the decentralization of said entities, to use previously inaccessible services, by using Smart Contracts to smooth the way and authenticate future transactions on the Smart Chain. Aside from this newfound access for the layman, a decentralized exchange will also centralize any garnered profits.

Community Driven-

GFT community has been deciding to use various and Binance Smart Chain to building all systems for Smooth and faster performance. Here we maintain some technology that we are using in developing the system. Our community keeps growing every day. Please join our social platforms to get updates. Our Community keeps growing everyday. Making money is good, but making money together is even better. We choose to share our success with the world to enhance the living standards of communities, your families, and your bank accounts.

OUR CORE TEAM

The team that runs the Green Forex project is the whole community who are loyal, hold their tokens and give their full support. That's why the project is described as community-driven, because without a loyal community we won't achieve the goals together. In addition, experienced specialists are hired to help with marketing to generate more awareness. These specialists have been in the crypto scene for a long time and know how to make Green Forex one of the top crypto projects.

GFT TOKEN CORE

TECHNICAL DESIGN: SIMPLE & SECURE

GREEN FOREX is an BSC token following the BEP20 protocol. We will take a conservative design approach in order to minimize the attack surface that complicated smart contracts present to hackers around the world. Furthermore, we chose not to use an advanced contract token architecture to minimize the number of ways the token and token-holders can be attacked. Our token contract is available to view here

GFT PARTNERSHIP

At Green Forex Staking, our mission is to involve everyone in the block chain revolution. We keep innovating, and building features to involve more people, and drive adoption. GFT aims to involve enthusiasts who don't have time to trade, don't know which token to trade or how to trade. It's a simplified community-driven initiative where crypto currency enthusiasts can find staking benefits, and let them grow their crypto currency portfolio with Green Forex Token . We have an existing community of token holders who can stake with the funds of new entrants and in return, earn commission and profits on the staking they make

TOKEN UTILITIES/BENEFITS

GFT is a payment token at GREENFOREX Platform, by which the trading fee, listing fee, etc. can be paid. GREENFOREX will implement a tiered membership system for users. The tiers will consist of "Standard" users and multiple levels of "Premium" users depending on the PROB holding by users . The service will provide enhanced benefits for those "Premium" users that hold the required PROB balance . The membership level will be adjusted on a daily basis. Premium users will qualify for enhanced fee discounts and referral bonus, listing voting rights, and priority access to new features and trading products.

Community Driven-

Making money is good, but making money together is even better. We choose to share our success with the world to enhance the living standards of communities, your families, and your bank accounts.

Why Choose GREENFOREX?

GFT will revolutionize the way we trade and engage with Crypto platforms by introducing a slew of innovative features. Secured By Bianace Smart Contract: GFT provides a safe, Fast, Reliable and Innovative core as the backbone used to define the parameters of GFT Platform and compile with Community need and Future.

GFT TOKEN CONCLUSION

TECHNICAL DESIGN: SIMPLE & SECURE

GFT has introduced a one-of-a-kind idea with Safe, Noncustodial, Near-Instant Transaction Settlements, Ease-of Use features and simple cryptocurrency payments as well as a digital arbitration resolution mechanism. The exciting doors the BEP Blockchain opens up for us will revolutionize the manner in which we trade. With increased throughput and energy efficiency alongside decreased fees, we are confident that this modern blockchain will allow us to offer a far more stable, cost effective and efficient means to trade. With the looming launch of BEP Smart Contracts posed to launch in the near future, we are increasingly excited for the coming months as current technologies are revolutionized and brought light years ahead of the current status quo.

Regulation in the cryptocurrency space is an ongoing debate for governments around the world. As the market for cryptocurrency exchanges has developed, there has been increased scrutiny on the business practices and security of exchanges. During the development of the Green Forex platform, we have seen governments install new regulations on cryptocurrency exchanges that have either halted or shut down operations in those countries. It is our belief that more regulatory measures will be GFT posed and debated that will define the future of cryptocurrencies. We hope to work with governments around the world to help define and implement regulations that will help ensure security for investors and GFT Holder the growth of the global cryptocurrency ecosystem. Despite our best efforts, Green Forex's entry as a cryptocurrency exchange comes with a fair share of risks that can interrupt or even terminate operations as a platform. These risks can include deliberate actions such as DDOS attacks, phishing, and stricter than anticipated regulatory requirements. To mitigate risks to the platform, we are continually staying abreast of the news and participate in discussions on the path forward for cryptocurrencies. The platform will implement security features outlined below at launch and in future development

Green Forex Disclaimer

This White Paper is documented with the intent to introduce GFT Community and its product offerings, and the GFT Token to prospective token holders in relevance with the proposed ICO and ongoing development plans. The objective here is to offer descriptive information to those with the sole intention of acquiring and holding GFT Tokens.

To the maximum extent and to the best of Green Forex's ability, Green Forex, any officers and employees (henceforth known as "Green Forex") shall not be liable for any losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this whitepaper or any part thereof by you.

Green Forex will do its best to launch its operations and develop the Green Forex platform and the Green Forex token ("GFT"). Green Forex assumes no liability or responsibility for any loss or damage that would result from or relate to the incapacity to use the GFT. This whitepaper is written to provide information on a platform being planned by Green Forex. All materials are for informational purposes only and should not be used as a basis for any investment decision. This whitepaper does not constitute or relate in any way nor should they be considered as an offering of securities in any jurisdiction. Any information contained in this whitepaper can change without any notice at the sole discretion of Green Forex. From time to time, updates may be made to this whitepaper and posted on the proper channels. It is the responsibility of the user to ensure they are in possession of the latest version of the whitepaper.

The cryptocurrency space faces large regulatory risk that may have a direct effect on Green Forex and the Green Forex Token ("GFT"). Regulatory authorities around the world are carefully scrutinizing businesses and operations associated to cryptocurrencies and related services. As a possible result of regulatory measures, investigations or actions by authorities, Green Forex's may be limited or prevented from developing its operations in the future. In such case, any person utilizing Green Forex's services acknowledges and understands that neither Green Forex nor any of its affiliate shall be held liable for any direct or indirect loss or damages caused by such changes.

Green Forex shall not be liable for any loss during the utilization of the Green Forex platform and GFT by any reason. This whitepaper and any other materials or explanations made by Green Forex shall not and cannot be considered as financial advice for an investment. Green Forex shall not be considered as advisor in any legal, tax or financial matters. Acquiring GFT shall not grant any right or influence over Green Forex's organization.

The logo consists of the letters 'GFT' in a white, bold, sans-serif font, centered within a dark green rounded square with a white border. The background of the slide features a large green abstract shape on the left and a white background with light purple and blue wavy patterns on the right. Several small colored squares (yellow, purple, cyan, orange) are scattered across the white background.
